

Plamen Hristov, PMP

» Director of Design Technology

EXPERIENCE AND BACKGROUND

Plamen brings 8 years of experience in the AEC industry in his role as the Director of Design Technology at Capital. His responsibilities include implementation of BIM, IPD, and Virtual Design, plus training company personnel for increased proficiency in Revit and BIM.

Prior to his role at Capital, Plamen conducted training and consulting for a major Autodesk reseller and presented at numerous events including Autodesk University, Revit Technology Conference, Green Build North America, AUGI CAD Camp, Ideate Presents and others.

He has published numerous articles and has been written up in such publications as Point of Beginning, and AEC Bites. He is currently coauthoring a book on "Mastering Revit MEP".

ROLE WITHIN CAPITAL

Plamen's unique role enables Capital to collaborate effectively with our BIM clients and help all the team members to be more successful through his proactive outreach. His goal is for teamwide success of the BIM implementation process.

Plamen continues to be a top presenter at Autodesk University and the Revit Technology Conferences and brings the perspectives gained from the experiences as well.
